Meet the Space Crew!

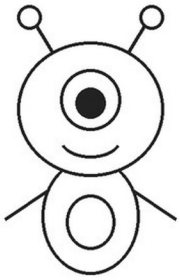

Astronaut

This is Astro! Astronauts are people who travel into space.

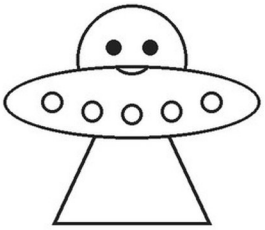

Rocket

Rockets are the only machines powerful enough to blast off into space.

Alien

Aliens are pretend creatures from other planets. What would yours look like?

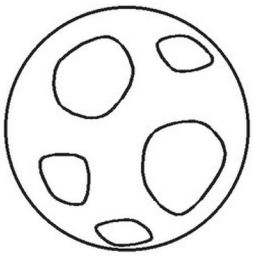

Ufo

UFO stands for Unidentified Flying Object.

Moon

The Moon goes all the way around the Earth about once a month.

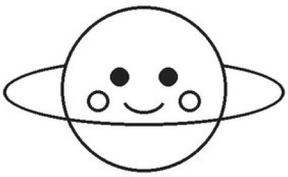

Earth

Earth is our home planet. It is the only planet we know that has life.

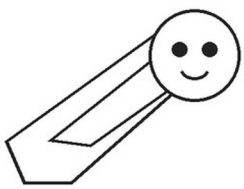

Mars

Mars is called the Red Planet because of its rusty red dust.

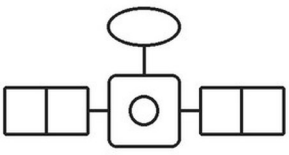

Planet

Saturn is a giant planet with beautiful rings made of ice and rock.

Comet

Comets are balls of ice and dust. They grow long tails near the Sun.

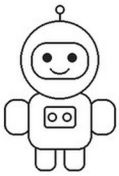

Satellite

Satellites go around the Earth and help with phones, TV and weather.

Mission 1

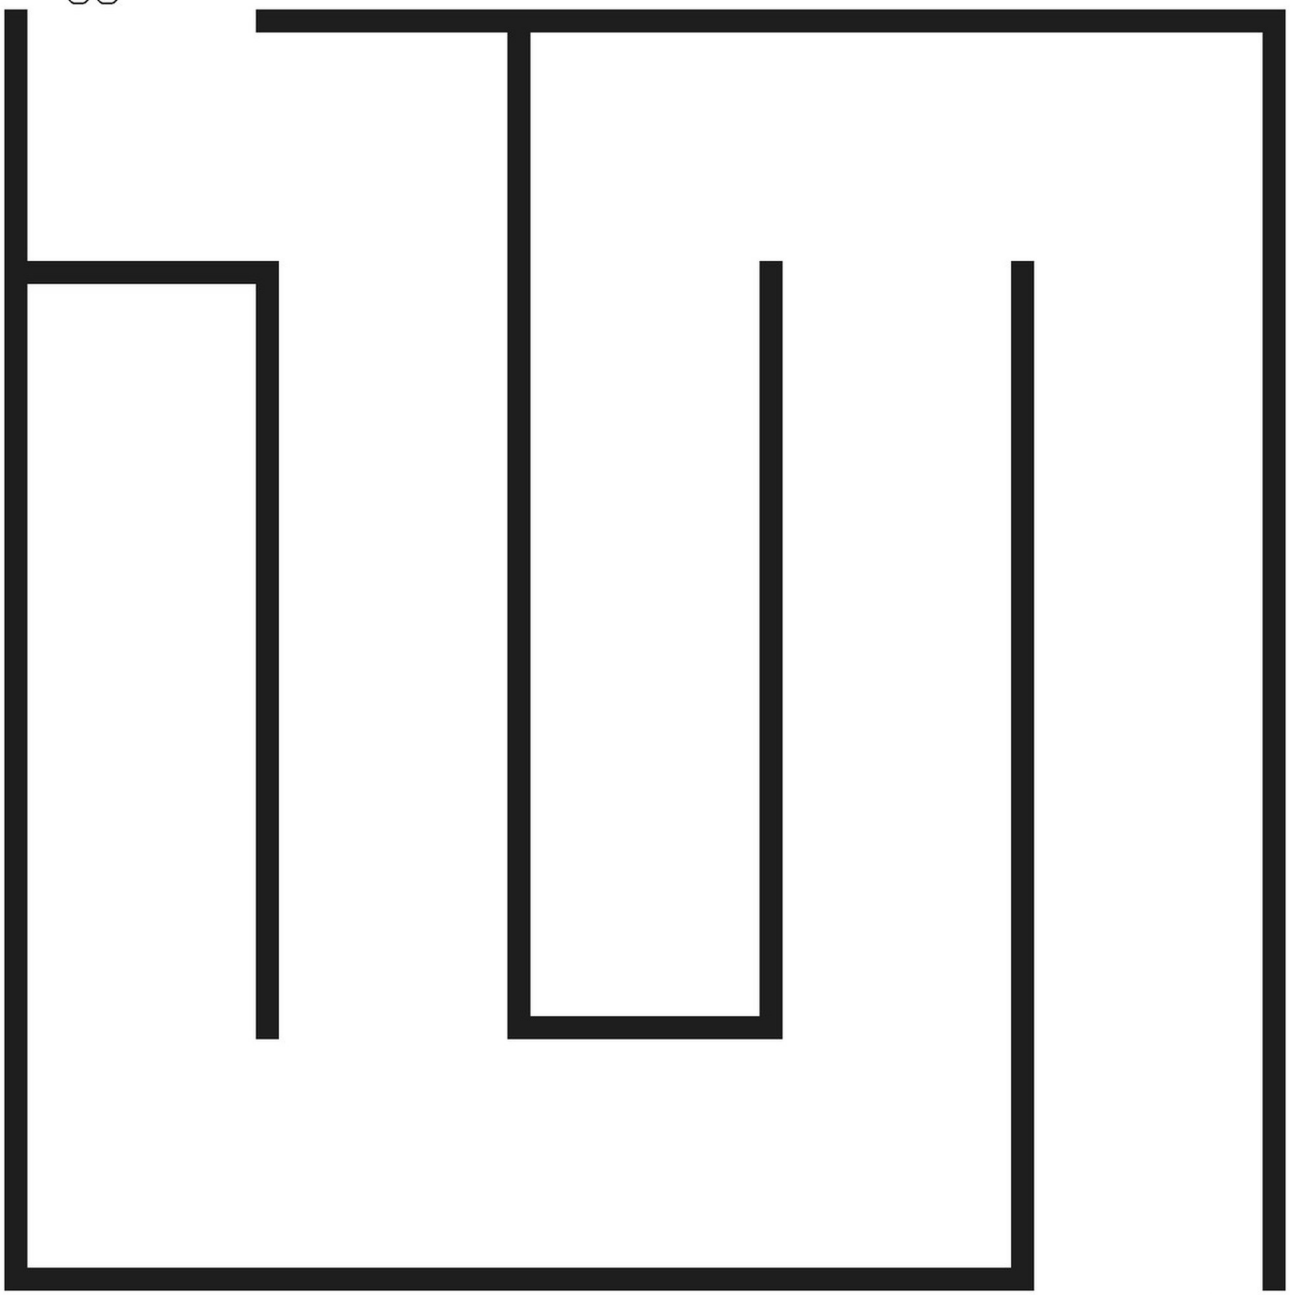

Help Astro get to the rocket!

Fact: People who travel into space are called astronauts.

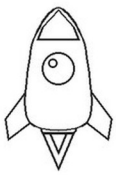

START

LAUNCH ★☆☆

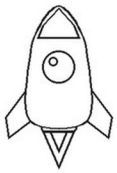

FINISH

Mission 2

Fly the rocket to the Moon!

Fact: The Moon is about 384,000 km away from Earth.

START

LAUNCH ★☆☆

FINISH

Mission 3

Help the little alien find its UFO!

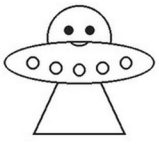

Fact: Nobody has ever found real aliens, but scientists keep looking.
